Presenter:

Richard L. Kissel

CISSP, CISM, IAM
Information Technology Lab,
Computer Security Division,
National Institute of
Standards and Technology

Richard Kissel is a Senior Information Security Analyst for the National Institute of Standards and Technology (NIST) in Gaithersburg, MD. His primary functions at NIST are: 1. Review Federal agency information security programs, and 2. Plan for and conduct information security workshops for small organization managers/staff.

Prior to joining NIST in 2001, he worked as an Information Security Analyst in the Computer Security Office at the U.S. Small Business Administration. He has worked in the information security profession for over 15 years. He has earned a B.S. and M.A. (Mathematics Major) from Austin Peay State University. His Information Security certifications include: Certified Information Systems Security Professional (CISSP), Certified Information Security Manager (CISM), and the National Security Agency certification in Infosec Assessment Methodology (IAM).

Computer Security

A Basics Workshop for Small Businesses

Tuesday, February 3, 2009
8:30 am - 12:30 pm

MEO Business Development Corp.
99 Mahalani Street
Wailuku, Maui

The NIST Computer Security Division has developed a workshop to **help the small business owner** increase information system security.

- Learn how to define information security (IS) for your organization.
- Hear examples of common types of threats and understand how to determine the extent to which your organization should proactively address threats.
- Learn common Best Practices and procedures to operate more securely.
- Hear a basic explanation of current technologies used in reducing IS vulnerabilities and learn of resources freely available to your organization.

For additional information visit:
