

Disclaimers to the FY 2005 Small Business Goaling Report

Fiscal Year 2005 is the second year FPDS NG has produced the Small Business Goaling Report. There are three issues identified in this year's report. One is government-wide, the other two are agency-specific.

Government-wide:

"The FY 2005 Small Business Goaling Report does not provide 8(a) credit for delivery orders against Indefinite Delivery Vehicle (IDVs). This issue will be fixed in time for the FY 2006 report."

USAID Specific:

"USAID is still in the process of entering their FY05 data into FPDS-NG, therefore this report is not a complete reflection of their small business achievement. USAID is working diligently to enter their data, and expect to be finished by the end of the summer"

DOD Specific:

"The number of actions reported is fewer than it should be because DOD consolidates certain actions into single contract reports. This does not affect the dollar amount or small business percentages"
